

LEVANT - Chairlift for straight stairs

Enrich your lifestyle.

ThyssenKrupp Access
Lifestyle redefined.

ThyssenKrupp

Quiet and comfortable:
with LEVANT BASIC
your movements are
comfortable and safe.

Levant Basic

Developed in collaboration with orthopedists and physiotherapists, Levant is designed with great attention to ergonomics as well as easy operation without sacrificing elegance and high safety standards.

EASY INSTALLATION Levant is being installed within a few hours, without any works required to the walls of your home. With the wireless call & send stations, there will be no exposed cables or wires.

EASY-TO-USE Thanks to the ergonomically designed joystick, you are able to drive the chair in the desired direction effortlessly. With help of the wireless call & send stations you are able to call or send the chair to the desired floor. The seat of the Levant opens and closes with a simple gesture, reating more space when the lift is not in use.

HINGE RAIL If the space in front of the stairs is limited due to a door opening or passage way, it is possible to equip the Levant with a hinge rail. The hinge rail allows the chair to be parked in the middle of the stairs and frees up space in front of the stairs.

SWIVEL SEAT Once arrived at the landing, the chair swivels in the direction of the landing allowing you to get on and off the seat safe and free from any hazards.

ANTI-CRUSH Levant is equipped with safety sensors which allows the chair to stop smoothly in case of any obstacles or obstructions on the stairs.

ANTI-BLACKOUT Levant is battery operated, allowing you to always complete your journey, even in the event of a power failure. The batteries will automatically recharge when the chair is parked at its charging stations.

COMFORT AND ELEGANT Levant Basic comes with vinyl upholstery which can be easily cleaned, an anti-slip footrest, ergonomic controls which provide ultimate comfort. The arm rests of Levant are designed to give you full support when getting on and off the chair. Going up and down the stairs has never been so easy!

Extremely comfortable,
Safe and easy to use:
LEVANT COMFORT
enriches your home.

Levant Comfort

Quality materials, contemporary and customizable design, and a high level of safety.

Levant Comfort has been developed to provide a chairlift which is extremely comfortable as well as offering a modern design. Levant Comfort integrates perfectly in your interior and allows you to customize the seat with choice out of four stylish vinyl upholstery choices.

Easy and intuitive, Levant Comfort is equipped with options such as an automatic swivel seat in two directions as well as adjustment of the seat height providing you with maximum comfort.

The retractable seatbelts, ergonomically designed joystick which also functions as key, and wireless call & send stations to call the chair to the desired floor are only some of the standard options of Levant Comfort, making your trip comfortable and safe.

Levant Comfort also offers the hinge rail option as well as a Heavy Duty option with an increased capacity.

Equipped with a series of safety devices, such as anti-crush sensors and the anti-blackout device, Levant Comfort is the top of the range chairlift for straight stairs.

Weatherresistant, safe
and robust.
LEVANT OUTDOOR
is the perfect solution
for your outdoor stairs.

Levant Outdoor

Resistant to harsh weather elements, Levant Outdoor is certified for outdoor use.

Levant Outdoor has an IPX5 protection which ensures total protection and resistance against the infiltration of water and dust into the drive unit.

The chair, drive unit and joystick are water proof, the rails is made of anodized aluminium and uses stainless steel screws.

Thanks to the infrared call & send stations, the stairs is completely free of cables and wires, providing a nice and clean installation.

The batteries in the drive unit are using a low voltage, and together with the anti-crush sensors they provide optimum protection.

Levant Outdoor is operated with a joystick which also functions as a key, allowing you to lock and prevent the unit against unauthorized use.

Levant Outdoor comes standard with an easy to clean protective cover allowing you to cover the chair when not in use.

SPECIFICATIONS LEVANT BASIC and LEVANT OUTDOOR

Capacity

138 kg (inclination between 28° and 45°)
127 kg (inclination between 46° and 53°)

Operation

Battery (24 V cc)

Rails

Rack and pinion drive system
Extruded anodized aluminium

Speed

Max 0,12 m/s

Inclination
